Experimental Biology

The Journal of Experimental Biology

EDITED BY

J. GRAY

ASSISTED BY

THE HON. SECRETARIES, SOCIETY FOR
EXPERIMENTAL BIOLOGY

VOLUME XXIX

CAMBRIDGE
AT THE UNIVERSITY PRESS

1952

Published for the Company of Biologists, Limited

*Printed in Great Britain at the University Press, Cambridge
(Brooke Crutchley University Printer)
and published by the Cambridge University Press*

London: Bentley House, N.W. 1

American Branch: New York

Agents for Canada, India, and Pakistan: Macmillan

CONTENTS

No. 1. MARCH 1952

	PAGE
A. D. HOBSON, W. STEPHENSON AND L. C. BEADLE. Studies on the physiology of <i>Ascaris lumbricoides</i> . I. The relation of the total osmotic pressure, conductivity and chloride content of the body fluid to that of the external environment. (With Three Text-figures)	I
A. D. HOBSON, W. STEPHENSON AND A. EDEN. Studies on the physiology of <i>Ascaris lumbricoides</i> . II. The inorganic composition of the body fluid in relation to that of the environment	22
H. HURST. An electron diffraction study of the structure and orientation of the lipids in yeast and bacterial cell walls. (With Plates 1-4 and Three Text-figures)	30
F. V. GRAY AND A. F. PILGRIM. Fermentation in the rumen of the sheep. III. Intermediate stages in the fermentation of wheaten hay <i>in vitro</i> by micro-organisms from the rumen. (With One Text-figure)	54
F. V. GRAY, A. F. PILGRIM, H. J. RODDA AND R. A. WELLER. Fermentation in the rumen of the sheep. IV. The nature and origin of the volatile fatty acids in the rumen of the sheep	57
LORD ROTHSCHILD AND K. W. CLELAND. The physiology of sea-urchin spermatozoa. The nature and location of the endogenous substrate	66
JANET MOORE. The induction of regeneration in the hydroid <i>Cordylophora lacustris</i> . (With Plate 5 and Fifteen Text-figures)	72
F. R. HARDEN JONES. The swimbladder and the vertical movements of teleostean fishes. II. The restriction to rapid and slow movements. (With Six Text-figures)	94
J. A. RAMSAY. The excretion of sodium and potassium by the Malpighian tubules of <i>Rhodnius</i> . (With Four Text-figures)	110
ANNE ROWLANDS. The influence of water and light upon the colour change of sightless frogs (<i>Rana temporaria</i>)	127
ELLEN THOMSEN. Functional significance of the neurosecretory brain cells and the corpus cardiacum in the female blow-fly, <i>Calliphora erythrocephala</i> Meig. (With Ten Text-figures)	137

No. 2. JUNE 1952

R. F. EWER. The effect of pituitrin on fluid distribution in <i>Bufo regularis</i> Reuss .	173
H. E. HENKES. Retinomotor and diurnal rhythm in crustaceans. (With Plates 6-8 and Five Text-figures)	178
JAS. D. P. GRAHAM AND THE LATE R. ST A. HEATHCOTE. Pharmacological investigation of the nature of the innervation of the muscles of <i>Helix aspersa</i> . (With Two Text-figures)	192

	PAGE
J. D. McCOLL AND R. J. ROSSITER. A comparative study of the lipids of the vertebrate central nervous system. I. Brain.	196
J. D. McCOLL AND R. J. ROSSITER. A comparative study of the lipids of the vertebrate central nervous system. II. Spinal cord. (With One Text-figure).	203
THE LATE AUGUST KROGH AND TORKEL WEIS-FOGH. A roundabout for studying sustained flight of locusts. (With Five Text-figures)	211
J. W. S. PRINGLE AND V. J. WILSON. The response of a sense organ to a harmonic stimulus. (With Plate 9 and Eight Text-figures)	220
D. M. ROSS. Facilitation in sea anemones. III. Quick responses to single stimuli in <i>Metridium senile</i> . (With Ten Text-figures)	235
J. A. KITCHING. Observations on the mechanism of feeding in the suctorian <i>Podophrya</i> . (With Plates 10 and 11 and Four Text-figures)	255
G. M. HUGHES. The co-ordination of insect movements. I. The walking movements of insects. (With Plate 12 and Eight Text-figures)	267
K. W. CLELAND AND LORD ROTHSCILD. The metabolism of the sea-urchin egg. Anaerobic breakdown of carbohydrate. (With One Text-figure)	285
J. L. CLOUDSLEY-THOMPSON. Studies in diurnal rhythms. II. Changes in the physiological responses of the woodlouse <i>Oniscus asellus</i> to environmental stimuli. (With Three Text-figures)	295
J. D. SMYTH. Studies on tapeworm physiology. VI. Effect of temperature on the maturation <i>in vitro</i> of <i>Schistocephalus solidus</i> . (With Fifteen Text-figures)	304
L. BAILEY. The action of the proventriculus of the worker honeybee, <i>Apis mellifera</i> L. (With Plate 13 and Seven Text-figures)	310
JOHN O. LAWS. The relationship of carbohydrate metabolism and mitotic activity in the mouse	328

No. 3. SEPTEMBER 1952

C. L. SMITH. Sympathomimetic activity in the isolated frog's heart (<i>Rana temporaria</i>). (With Seven Text-figures)	337
J. M. MITCHISON AND M. M. SWANN. Optical changes in the membranes of the sea-urchin egg at fertilization, mitosis and cleavage. (With Plates 14 and 15)	357
J. A. KITCHING. The physiology of contractile vacuoles. VIII. The water relations of the suctorian <i>Podophrya</i> during feeding. (With Four Text-figures)	363
G. D. GLYNNE JONES. The responses of the honey-bee to repellent chemicals. (With Four Text-figures)	372
G. M. HUGHES. Differential effects of direct current on insect ganglia. (With Plate 16 and Six Text-figures)	387
J. R. ERICHSEN JONES. The reactions of fish to water of low oxygen concentration. (With Eight Text-figures)	403
K. W. CLELAND AND LORD ROTHSCILD. The metabolism of the sea-urchin egg. Oxidation of carbohydrate. (With Five Text-figures)	416

R. F. EWER. The effects of posterior pituitary extracts on water balance in <i>Bufo carens</i> and <i>Xenopus laevis</i> , together with some general considerations of anuran water economy. (With One Text-figure)	429
D. N. GRINDLEY. The composition of the body fat of small green chironomids	440
J. L. HANCOCK. The morphology of bull spermatozoa. (With Plates 17-19 and One Text-figure)	445
R. E. BILLINGHAM AND P. B. MEDAWAR. The freezing, drying and storage of mammalian skin. (With Three Text-figures)	454
LORD ROTHSCHILD AND M. M. SWANN. The fertilization reaction in the sea-urchin. The block to polyspermy. (With Six Text-figures)	469
C. H. WADDINGTON. Preliminary observations on the mechanism of cleavage in the amphibian egg. (With Five Text-figures)	484
C. H. WADDINGTON. On the existence of regionally specific evocators	490
C. H. WADDINGTON AND E. M. DEUCHAR. The effect of type of contact with the organizer on the nature of the resulting induction. (With Plates 20 and 21 and Five Text-figures)	496

No. 4. DECEMBER 1952

G. R. WYKES. The preferences of honeybees for solutions of various sugars which occur in nectar	511
ARTHUR WALTON. Flow orientation as a possible explanation of 'wave-motion' and 'rheotaxis' of spermatozoa. (With Six Text-figures)	520
D. H. WILKINSON. The random element in bird 'navigation'. (With Seventeen Text-figures)	532
V. B. WIGGLESWORTH. The thoracic gland in <i>Rhodnius prolixus</i> (Hemiptera) and its role in moulting. (With Six Text-figures)	561
M. E. DAVIES AND E. B. EDNEY. The evaporation of water from spiders. (With Two Text-figures)	571
H. MUNRO FOX. Anal and oral intake of water by Crustacea	583
J. B. CRAGG AND PATRICIA COLE. Diapause in <i>Lucilia sericata</i> (Mg.) Diptera. (With One Text-figure)	600
ERIC PONDER. Various types of ghosts derived from human red cells: heat fragmentation and phase optics studies. (With Two Text-figures)	605
V. B. WIGGLESWORTH. Hormone balance and the control of metamorphosis in <i>Rhodnius prolixus</i> (Hemiptera). (With Plates 22 and 23 and Two Text-figures)	620
D. W. M. HERBERT AND J. C. MERKENS. The toxicity of potassium cyanide to trout. (With Five Text-figures)	632
SYDNEY SMITH. Studies in the development of the rainbow trout (<i>Salmo irideus</i>). II. The metabolism of carbohydrates and fats. (With Two Text-figures)	650
H. B. BARLOW. The size of ommatidia in apposition eyes. (With Three Text-figures)	667
Index	675

INDEX OF SUBJECTS

A

- Amphibian egg:**
Preliminary observations on the mechanism of cleavage in the (WADDINGTON) 484
- Anuran water economy:**
See Pituitary extracts
- Apis mellifera:**
See Honey-bee
- Ascaris lumbricoides:**
Studies on the physiology of. I. The relation of the total osmotic pressure, conductivity and chloride content of the body fluid to that of the external environment (HOBSON, STEPHENSON and BEADLE) 1
— II. The inorganic composition of the body fluid in relation to that of the environment (HOBSON, STEPHENSON and EDEN) 22

B

- Bacterial cell walls:**
See Yeast
- Bird 'navigation':**
The random element in (WILKINSON) 532
- Blow-fly:**
Functional significance of the neuro-secretory brain cells and the corpus cardiacum in the female, *Calliphora erythrocephala* Meig. (THOMSEN) 137
- Body fat:**
The composition of, of small green chironomids (GRINDLEY) 440
- Body fluid:**
See *Ascaris lumbricoides* and *Bufo regularis* Reuss
- Brain cells:**
Functional significance of the neuro-secretory, and the corpus cardiacum in the female blow-fly, *Calliphora erythrocephala* Meig. (THOMSEN) 137
- Bufo carens:**
The effects of posterior pituitary extracts on water balance in, and *Xenopus laevis*, together with some general considerations of anuran water economy (EWER) 429
- Bufo regularis** Reuss:
The effect of pituitrin on fluid distribution in (EWER) 173
- Bull spermatozoa:**
The morphology of (HANCOCK) 445

C

- Calliphora erythrocephala** Meig.:
See Blow-fly
- Carbohydrate metabolism:**
The relationship of, and mitotic activity in the mouse (LAWS) 328
— See also Rainbow trout and Sea-urchin egg

Chironomids:

- The composition of the body fat of small green (GRINDLEY) 440

Cleavage:

- See Sea-urchin egg and Amphibian egg

Colour change:

- The influence of water and light upon the, of sightless frogs (*Rana temporaria*) (ROWLANDS) 127

Contractile vacuoles:

- The physiology of. VIII. The water relations of the suctorian *Podophrya* during feeding (KITCHING) 363

Cordylophora lacustris:

- See Hydroid

Corpus cardiacum:

- See Blow-fly

Crustaceans:

- Retinomotor and diurnal rhythm in (HENKES) 178
— See also Intake of water

D

Diapause:

- in *Lucilia sericata* (Mg.) Diptera (CRAGG and COLE) 600

Diurnal rhythm:

- Retinomotor and, in crustaceans (HENKES) 178
— Studies in. II. Changes in the physiological responses of the woodlouse *Oniscus asellus* to environmental stimuli (CLOUDSLEY-THOMPSON) 295

E

Evaporation of water:

- from spiders (DAVIES and EDNEY) 571

Evocators:

- On the existence of regionally specific (WADDINGTON) 490

Excretion:

- See Malpighian tubules

Eyes:

- See Ommatidia

F

Facilitation:

- in sea anemones. III. Quick responses to single stimuli in *Metridium senile* (ROSS) 235

Fats:

- See Rainbow trout

Fatty acids:

- See Fermentation

Feeding:

- Observations on the mechanism of, in the suctorian *Podophrya* (KITCHING) 255

Fermentation:

in the rumen of the sheep. III. Intermediate stages in the fermentation of wheaten hay *in vitro* by micro-organisms from the rumen (GRAY and PILGRIM) 54

— IV. The nature and origin of the volatile fatty acids in the rumen of the sheep (GRAY, PILGRIM, RODDA and WELLER) 57

Fertilization reaction:

in the sea-urchin. The block to polyspermy (ROTHSCHILD and SWANN) 469

— *See also* Sea-urchin egg

Fish:

The reactions of, to water of low oxygen concentrations (JONES) 403

Flight of locusts:

See Locusts

Flow orientation:

as a possible explanation of 'wave-motion' and 'rheotaxis' of spermatozoa (WALTON) 520

Fluid distribution:

See *Bufo regularis* Reuss

Frog's heart:

Sympathomimetic activity in the isolated (*Rana temporaria*) (SMITH) 337

H**Harmonic stimulus:**

The response of a sense organ to a (PRINGLE and WILSON) 220

Helix aspersa:

Pharmacological investigation of the nature of the innervation of the muscles of (GRAHAM and HEATHCOTE) 192

Honey-bee:

The action of the proventriculus of the worker, *Apis mellifera* L. (BAILEY) 310

— The responses of the, to repellent chemicals (JONES) 372

— The preferences of, for solutions of various sugars which occur in nectar (WYKES) 511

Hormone balance:

and the control of metamorphosis in *Rhodnius prolixus* (Hemiptera) (WIGGLESWORTH) 620

Human red cells:

Various types of ghosts derived from. Heat fragmentation and phase optics studies (PONDER) 605

Hydroid:

The induction of regeneration in the, *Cordylophora lacustris* (MOORE) 72

I**Induction:**

The effect of type of contact with the organizer on the nature of the resulting (WADDINGTON and DEUCHAR) 496

— of regeneration in the hydroid *Cordylophora lacustris* (MOORE) 72

Innervation of muscles:

Pharmacological investigation of the nature of the, of *Helix aspersa* (GRAHAM and HEATHCOTE) 192

Insect ganglia:

Differential effects of direct current on (HUGHES) 387

Insect movements:

The co-ordination of. I. The walking movements of insects (HUGHES) 267

Intake of water:

Anal and oral, by Crustacea (FOX) 583

L**Lipids:**

An electron diffraction study of the structure and orientation of the, in yeast and bacterial cell walls (HURST) 30

— A comparative study of the, of the vertebrate central nervous system. I. Brain (MCCOLL and ROSSITER) 196

— — II. Spinal cord (MCCOLL and ROSSITER) 203

Locusts:

A roundabout for studying sustained flight of (KROGH and WEIS-FOGH) 211

Lucilia sericata (Mg.):

Diapause in (CRAGG and COLE) 600

M**Malpighian tubules:**

The excretion of sodium and potassium by the, of *Rhodnius* (RAMSAY) 110

Mammalian skin:

The freezing, drying and storage of (BILLINGHAM and MEDAWAR) 454

Metabolism:

of the sea-urchin egg. Anaerobic breakdown of carbohydrate (CLELAND and ROTHSCCHILD) 285

— of the sea-urchin egg. Oxidation of carbohydrate (CLELAND and ROTHSCCHILD) 416

— *See also* Carbohydrate metabolism

Metamorphosis:

See *Rhodnius prolixus*

Metridium senile:

See Sea anemones

Micro-organisms:

See Fermentation

Mitosis:

See Sea-urchin egg

Mitotic activity:

See Mouse and Sea-urchin egg

Moulting:

See *Rhodnius prolixus*

Mouse:

The relationship of carbohydrate metabolism and mitotic activity in the (LAWS) 328

Movements:

See Teleostean fishes, Locusts, Insect movements and Flow orientation

Nectar:

N

See Sugars

O

Ommatidia:

The size of, in apposition eyes (BARLOW)

667

Oniscus asellus:

See Woodlouse

Organizer:

The effect of type of contact with the, on the nature of the resulting induction (WADDINGTON and DEUCHAR)

496

Oxygen concentration:

The reactions of fish to low (JONES)

403

P

Pituitary extracts:

The effects of posterior, on water balance in *Bufo carens* and *Xenopus laevis*, together with some general considerations of anuran water economy (EWER)

429

Pituitrin:

The effect of, on fluid distribution in *Bufo regularis* Reuss (EWER)

173

Podophrya:

See Suctorian

Polyspermy:

The fertilization reaction in the sea urchin. The block to (ROTHSCHILD and SWANN)

469

Potassium:

See Malpighian tubules

Potassium cyanide:

The toxicity of, to trout (HERBERT and MERKENS)

632

Proventriculus:

The action of the, of the worker honeybee, *Apis mellifera* L. (BAILEY)

310

R

Rainbow trout:

Studies in the development of the (*Salmo irideus*). II. The metabolism of carbohydrates and fats (SMITH)

650

Rana temporaria:

See Colour change and Sympathomimetic activity

Retinomotor and diurnal rhythm:

in crustaceans (HENKES)

178

'Rheotaxis':

See Flow orientation

Rhodnius prolixus:

The excretion of sodium and potassium by the Malpighian tubules of (RAMSAY)

110

— The thoracic gland in, (Hemiptera) and its role in moulting (WIGGLESWORTH)

561

— Hormone balance and the control of metamorphosis in (Hemiptera) (WIGGLESWORTH)

620

Rumen:

Fermentation in the, of the sheep. III. Intermediate stages in the fermentation of wheaten hay *in vitro* by micro-organisms from the rumen (GRAY and PILGRIM)

54

— IV. The nature and origin of the volatile fatty acids in the rumen of the sheep (GRAY, PILGRIM, RODDA and WELLER)

57

S

Salmo irideus:

See Rainbow trout

Schistocephalus solidus:

Studies on tapeworm physiology. VI.

Effect of temperature on the maturation *in vitro* of (SMYTH)

304

Sea anemones:

Facilitation in. III. Quick responses to single stimuli in *Metridium senile* (ROSS)

235

Sea-urchin egg:

The metabolism of the. Anaerobic breakdown of carbohydrate (CLELAND and ROTHCHILD)

285

— Optical changes in the membranes of the, at fertilization, mitosis and cleavage (MITCHISON and SWANN)

357

— The metabolism of the. Oxidation of carbohydrate (CLELAND and ROTHCHILD)

416

— See also Fertilization reaction

Sea-urchin spermatozoa:

The physiology of. The nature and location of the endogenous substrate (ROTHSCHILD and CLELAND)

66

Sense organ:

The response of a, to a harmonic stimulus (PRINGLE and WILSON)

220

Sheep:

See Rumen

Sightless frogs:

The influence of water and light upon the colour change of (*Rana temporaria*) (ROWLANDS)

127

Sodium:

See Malpighian tubules

Spermatozoa:

Flow orientation as a possible explanation of 'wave-motion' and 'rheotaxis' of (WALTON)

520

— See also Sea-urchin spermatozoa and Bull spermatozoa

Spiders:

The evaporation of water from (DAVIES and EDNEY)

571

Suctorian:

Observations on the mechanism of feeding in the, *Podophrya* (KITCHING)

255

— The physiology of contractile vacuoles. VIII. The water relations of the, *Podophrya* during feeding (KITCHING)

363

Sugars:

The preferences of honey-bees for solutions of various, which occur in nectar (WYKES) 511

Swimbladder:

and the vertical movements of teleostean fishes. II. The restriction to rapid and slow movements (JONES) 94

Sympathomimetic activity:

in the isolated frog's heart (*Rana temporaria*) (SMITH) 337

T**Tapeworm physiology:**

Studies on. VI. Effect of temperature on the maturation *in vitro* of *Schistocephalus solidus* (SMYTH) 304

Teleostean fishes:

The swimbladder and the vertical movements of. II. The restriction to rapid and slow movements (JONES) 94

Thoracic gland:

in *Rhodnius prolixus* (Hemiptera) and its role in moulting (WIGGLESWORTH) 561

Trout:

The toxicity of potassium cyanide to (HERBERT and MERKENS) 632

V**Vertebrate central nervous system:**

A comparative study of the lipids of the. I. Brain (McCOLL and ROSSITER) 196
— II. Spinal cord (McCOLL and ROSSITER) 203

W**Water balance:**

See Pituitary extracts

Woodlouse:

Studies in diurnal rhythms. II. Changes in the physiological responses of the, *Oniscus asellus* to environmental stimuli (CLOUDSLEY-THOMPSON) 295

X**Xenopus laevis:**

The effects of posterior pituitary extracts on water balance in *Bufo carens* and, together with some general considerations of anuran water economy (EWER) 429

Y**Yeast:**

An electron diffraction study of the structure and orientation of the lipids in, and bacterial cell walls (HURST) 30

INDEX OF AUTHORS

B

- Bailey, L.** The action of the proventriculus of the worker honeybee, *Apis mellifera* L. 310
- Barlow, H. B.** The size of ommatidia in apposition eyes 667
- Beadle, L. C.** See HOBSON, STEPHENSON and BEADLE
- Billingham, R. E. and Medawar, P. B.** The freezing, drying and storage of mammalian skin 454

C

- Cleland, K. W. and Rothschild, Lord.** The metabolism of the sea-urchin egg. Anaerobic breakdown of carbohydrate 285
- The metabolism of the sea-urchin egg. Oxidation of carbohydrate 416
- Cleland, K. W.** See ROTHSCHILD and CLELAND
- Cloudsley-Thompson, J. L.** Studies in diurnal rhythms. II. Changes in the physiological responses of the woodlouse *Oniscus asellus* to environmental stimuli 295
- Cole, Patricia.** See CRAGG and COLE
- Cragg, J. B. and Cole, Patricia.** Diapause in *Lucilia sericata* (Mg.) Diptera 600

D

- Davies, M. E. and Edney, E. B.** The evaporation of water from spiders 571
- Deuchar, E. M.** See WADDINGTON and DEUCHAR

E

- Eden, A.** See HOBSON, STEPHENSON and EDEN
- Edney, E. B.** See DAVIES and EDNEY
- Ewer, R. F.** The effect of pituitrin on fluid distribution in *Bufo regularis* Reuss 173
- The effects of posterior pituitary extracts on water balance in *Bufo carens* and *Xenopus laevis*, together with some general considerations of anuran water economy 429

F

- Fox, H. Munro.** Anal and oral intake of water by Crustacea 583

G

- Graham, Jas. D. P. and Heathcote, the late R. St A.** Pharmacological investigation of the nature of the innervation of the muscles of *Helix aspersa* 192
